

WEEK 4 - ASSIGNMENT 2

JAVA

Q1. Write a program in java to input a sentence and decode the given string by shifting each character of a string the number of times as specified by user.

Example

Sample Input: s = GOOD BOY Shift Value = 3

Sample Output: JRRG ERB

Q2. Write a program in java to input two string and combine them by extracting each character from both string simultaneously.

Example

Sample Input: HELLO
 JAVA

Sample Output: HJEALVLAO

Q3. Write a program in java to input a string and a character and check whether this character exists in the string or not.

Q4. Write a program in java input a string and convert it to title case. Title case means that the first letter of each word is capitalized.
